Microsoft

Supercharge Your Power Platform Integrations with Model Context Protocol (MCP)

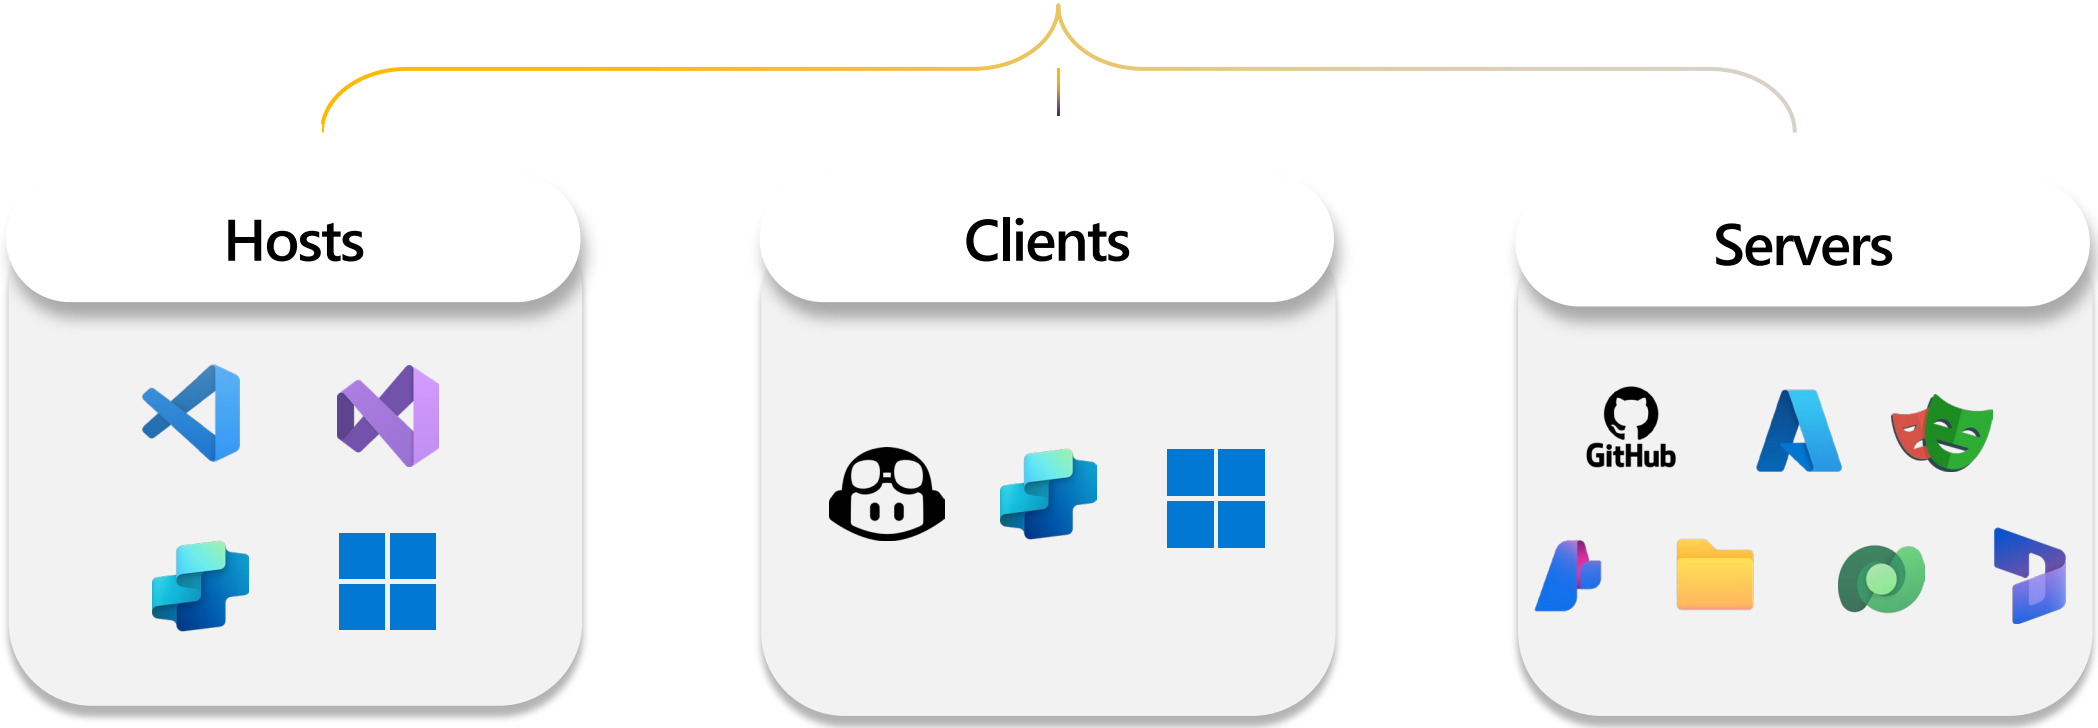
Daniel Laskewitz

Senior Cloud Advocate (Power Platform)

Microsoft

What is MCP?

MCP is an open protocol that standardizes how applications & services provide context to LLMs.

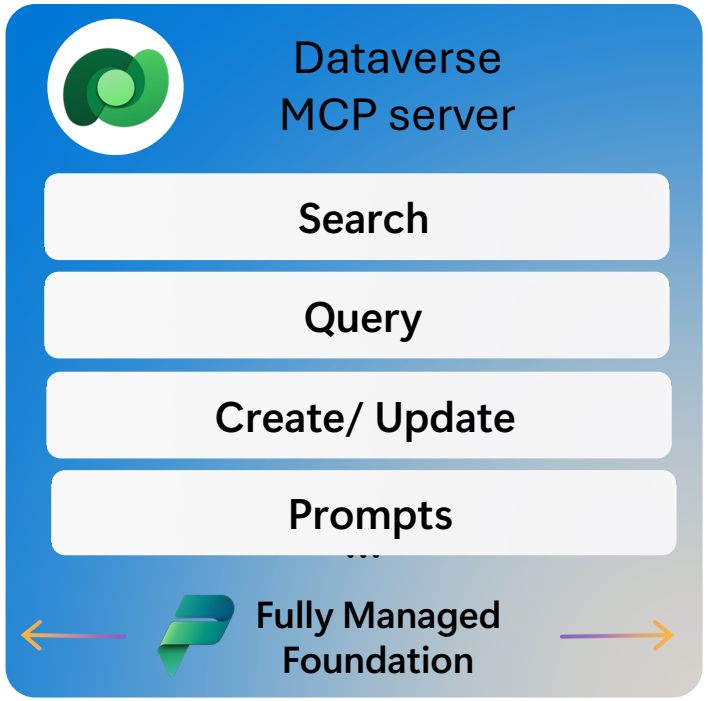


MCP in Microsoft Copilot Studio

- **You can add:**
  - Your own custom MCP server (via a custom connector)
  - One of the OOTB Microsoft MCP servers
  - A third party MCP server
- **It is built on top of the connector ecosystem, so you get some benefits:**
  - Data Loss Prevention
  - Authentication
  - Virtual Network support, and more

DEMO:
MCP in Copilot Studio

Dataverse MCP



- D365 Sales MCP server
- D365 Supply Chain MCP server
- D365 Service MCP server
- D365 Finance MCP server
- D365 Business Central MCP server
